Selex® Radiata Pine Trimboards are manufactured based on a Finger-Joint system, free of defects, of excellent aesthetic quality, with tremendous mechanical and physical resistance, and moisture resistance. These pieces are finished with two layers of exterior latex primer that are applied in vacuum chambers, giving each Trimboard the highest aesthetic quality available.

They are offered in different sizes in thickness, width, and length.

- Density: Between 400 to 480 Kg/m³
- Exterior grade cross-linking PVA (Polyvinyl Acetate), non-structural adhesive.
- High performance adhesive with outstanding results on porous substrates.
- Gloss: Over 3 units of matte shine at a 60 degree angle.
- Carbonization rate of 7 mm/min.

ENVIRONMENTALLY RESPONSIBLE PRODUCT

- Made from wood grown in sustainably-managed plantation forests.
- Effective quality control throughout the whole process.

APPLICATIONS

- Repair & Remodeling, Furniture, and other do-it-yourself projects.
