This product is made from high-quality, sustainably-managed Radiata Pine lumber. It is finger-jointed, extremely versatile and easy to install, as the product is pre-primed in a vacuum chamber at the manufacturing facility.

It comes in straight and smooth pieces, ideal for horizontal, vertical, or diagonal finishes and decorative end uses.

Premium Finish

- Clear Radiata Pine fiber.
- Two-Coat finish: white latex paint for outdoor use.
- Double polishing to achieve a smooth finish and texture.
- Controlled drying system for greater adhesion of latex coatings.
- Quality control that assures consistency in the thickness tolerance.
- The use of micro finger-joints creates a larger contact surface, tighter joints, and, therefore, higher structural resistance.

ENVIRONMENTALLY RESPONSIBLE PRODUCT

- Made from wood grown in sustainably-managed plantation forests.
- Effective quality control throughout the whole process.

APPLICATIONS

- Interior decorative uses.
- Not recommended for exterior applications.

GENERAL SPECIFICATIONS

Adhesive	Non-structural adhesive Cross-Liking PVA (Polyvinyl Acetate) of exterior grade.
Painted	100% water-based acrylic coating applied at the factory.
