

ThurmaPure™

Born of nature. Built for life.

Welcome to ThurmaPure™

Thermally Modified Wood.

Naturally Reimagined.

ThurmaPure™ is more than just a name, it's a statement of transformation, strength, and purpose. Derived from the Greek root "thermo", meaning heat, the word "Thurma" evokes the purity and power of thermal energy, the very force behind our innovation. At ThurmaPure™, we harness this natural energy to refine raw lumber through controlled heat and steam, producing wood that is stronger, more stable, and more beautiful, without the use of harsh chemicals.

We turn nature's raw potential into high-performance material, responsibly crafted for today's builders, architects, and visionaries.

The ThurmaPure™ Advantage

Thermally Modified, Not Chemically Treated
We use only heat and steam to enhance wood at the cellular level.
No toxins, no preservatives just pure, performance-driven innovation.

Superior Dimensional Stability
Enjoy up to 80% less expansion and contraction, delivering straighter, longer-lasting boards in any climate.

Decay and Rot Resistance Reduced moisture absorption means natural protection against mold, fungi, and rot ideal for outdoor use.

Rich, Deep Color Throughout
Thermal processing creates warm, earthy tones that run through the entire board, not just on the surface.

Lightweight and Easy to Handle
Our boards contain less moisture, making them lighter and easier to transport, cut, and install.

Versatile Workability Cut it, shape it, glue it. Paint it ThurmaPure™ works like traditional wood but outperforms it in every way.

100% Chemical-Free & Eco-Conscious
Sustainably harvested, non-toxic, and responsibly manufactured in the USA, makes a cleaner, greener choice.

Why Choose ThurmaPure™?

- **Responsibly Harvested**

We use domestically sourced wood from sustainably managed forests across the United States.

- **Longer Service Life**

Heat treatment changes the wood's cellular structure, giving it a hydrophobic quality that resists the elements.

- **Carbon-Conscious Building**

Wood is a natural carbon sink. Choosing ThurmaPure™ helps reduce emissions and supports sustainable construction.

Applications

Decking

A stunning, natural alternative to pressure-treated or imported hardwood decking. Built for beauty, durability, and no chemicals.

Siding

Offered in multiple profiles and species, ThurmaPure™ siding delivers warm curb appeal with long-lasting performance.

Dimensional Lumber

From interior trims and flooring to exterior millwork and furniture-grade components, ThurmaPure™ dimensional lumber performs across all applications.

ThurmaPure™ Color & Aging

Thermal Coloration

Our process brings out a rich brown hue that's baked into the wood with no staining necessary.

Natural Aging

Left unfinished, the wood will develop a silvery patina over time. For those wanting to preserve the original tone, apply a UV-protective finish.

Custom Finish Options

Maintain the rich, original color or embrace the natural aging process. With ThurmaPure™, the choice is yours.

Build Beautiful. Build Cleaner. Build Smarter.
